EDUCATION

Indian Institute of Technology (BHU), Varanasi

July'19 – May'23

Bachelor of Technology '23

CGPA : 8.21

India Institute of Technology, Madras

Jan'22 – Present

Diploma in Computer Programming

EXPERIENCE

Husk Power System

June'23 – Sept'23

Software Engineer

- Revamped Huskify's codebase for a **30%** build time reduction, which has **50,000+** Play Store downloads
- Implemented a **Load balancer in Golang**, boosted traffic-handling capacity by **3 times** for the **Diwali sale**
- Implemented **caching** mechanism for HTTP responses, resulting in a **36%** improvement in data retrieval speed.
- Utilized **GitHub Actions** to enable **continuous deployment(CI/CD)** to **AWS EC2** instances.
- Integrated **Zod** for input validation in both backend and frontend, resulting a **60%** decrease in incorrect inputs.
- Integrated **shimmer effect** in Huskify, boosting user retention by **28%** with reduced perceived loading time.
- Executed, single-handedly the **figma** design of the new product detail screen, by using **TailwindCSS** and **recoil**.
- Formulated **test cases** for APIs in **Postman**, pacing software development by **40%** and enhancing reliability.
- **Technologies:** TypeScript, Golang, React Native, Zod, AWS EC2, Postman, Git/GitHub & Jira

KT Industries

May'22 – July'22

Software Developer Intern

- Developed **responsive shopping cart** for an E-commerce website, resulting in user-friendly shopping experience.
- Developed **Express APIs** for retrieving product details and placing orders, leading to increased company sales.
- Implemented **JWT authentication** to ensure secure user access , strengthening data protection.
- Implemented features such as **Save for Later**, **Social media sharing**, and **Get order summary**.
- **Technologies:** React, Node, Express, MongoDB, HTML, JavaScript, Postman, MUI & Git/GitHub

PROJECTS

Course-X : E2E Fullstack Course Marketplace build on MERN | [Website link](#) | [Repo link](#)

May'23 – June'23

- Implemented a **monolithic repository architecture** for user, admin, & server-side apps, encouraging **DRY**.
- Used NextJS for **Server-Side Rendering**, eliminating **waterfalling effect** and improving **SEO** performance
- Ensured API endpoint security by **JWT** & custom **middlewares**, restricting access to authenticated clients only
- Utilized the **Recoil** library to enhance state management in the **NextJS** application
- Executed the deployment of both frontend and backend application onto **AWS EC2 instances**.
- **Technologies:** TypeScript, Next, Express, Node, MongoDB, AWS EC2, Zod, TurboRepo & CI/CD

X-Flix : Fullstack Online video platform(OVP) | [Website link](#) | [Repo link](#)

Dec'22 – Jan'23

- Implemented video filtering based on **age** & **genre**, sorting by **release date** & **views** for better user experience.
- Developed APIs by using **Express** to fetch video details and update like counts in **MongoDB** database.
- Engineered React component with Express API to enable **video uploads** with thumbnail, title, and genre.
- **Technology stack:** React JS, JavaScript, Express, MongoDB, Material UI & React Router

ACHIEVEMENTS

- Achieved highest rating of **1535 (Specialist)** on [Codeforces](#) and **1846** on [Leetcode](#)
- Attained Global Rank **967** out of **10,000+** participants in **Codeforces Round 802 (Div.2)**.
- Attained Global Rank **1136** out of **24,000+** participants in **Leetcode Biweekly contest 84**.
- Attained Global Rank **1622** out of **23,000+** participants in **Leetcode Biweekly contest 82**.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Golang, C++, SQL, HTML
- **CS concepts:** Data structures & Algorithms, Database management system, OOPS, Operating system
- **Tools & Technologies:** React, Express, Node, MongoDB, Next, Docker, Recoil, React Native, Material UI, ZOD, Turborepo, TailwindCSS, Git, Github, AWS EC2 & lambda, Linux, Jest, MySQL
